

Reinforcement ring of stainless steel pipes for vacuum systems

Scope

This standard provides recommendations for reinforcement rings of stainless steel pipes for vacuum systems. The document is used in industries as a base for design, manufacture and installation of pipe systems with an internal underpressure.

Changes since the previous edition

This edition differs from the previous one in that:

- Clarifying text on how to measure the length of elbows and bends has been added.
- References have been updated.

Contents

1	Reinforcement ring dimensions.....	2
2	Materials	2
3	Dimensioning.....	3
4	References.....	4
