

General technical provisions for pipeline contracts

Information within brackets ([...]) in this document refers to local regulations.

Scope

This standard provides information on general technical provisions for contract work with pipelines classified under the Pressure Equipment Directive (PED) 2014/68/EU.

The standard is used during procurement and contains appendices to documentation and commitments for contract work performed on pressurised equipment. The attachments are also available in editable format.

Changes since the previous edition

This version differs from the previous one as follows:

- References to documents have been updated to current editions and the information in the guide has been customised to match them.
- New information on protection against harmful media has been added in 3.1 – “General”
- Section 3.4 – “Design” has been added. Some information has been moved here from sections 3.7 – “Installation” and 3.10 – “Control and testing”.
- Section 3.11 – “Documentation” has been added. Some information has been moved here from section 3.10 – “Control and testing”.
- Sections 3.12 – “Delivery” and 3.13 – “Marking” have been added.
- Chapter numbering has been adjusted.
- The standard appearance has been updated according to the current template for SSG standards.
