Förhandsgranskning / Preview

Cleaning methods for metallic materials before all types of painting and composite application

Information within brackets ([…]) in this document refers to local regulations.

Scope

This guide provides a general description of various cleaning methods during preparation prior to painting and composite application. Both washing/degreasing and mechanical cleaning is described.

The guide is primarily aimed at purchasers of surface treatment to provide an overview of available methods.

Important!
This document serves as guidance and should normally not be used as a basis for procurement. Cleaning prior to painting shall be carried out in accordance with SSG 1005.

Changes since the previous edition

This edition differs from the previous one in that:

- A clarification has been added stating that this document is a guide.
- References have been updated and reviewed.
