STANDARD SOLUTIONS GROUP

Recommendations for the inspection of painting

Information within brackets (**[...]**) in this document refers to local regulations.

Scope

This standard gives recommendations for inspection of painting at industrial plants. The document is used for support during planning, procurement and execution of inspection during painting, to ensure that the work is done correctly and avoid incorrect execution followed by large costs for reparation and maintenance.

Changes since the previous edition

This edition differs from the previous in that:

- Chapter 3.3.4 – “Inspection of preparation prior to painting” has been updated
- References have been checked and updated.
- The document has been language reviewed and updated according to the current template for SSG standards.
