

Insulation of pipelines Constructional details

Introduction

This standard gives additional instructions regarding the construction of insulation and cladding on pipelines in accordance with SSG 1591E, Insulation of pipelines, ventilation ducts, certain smoke flues etc. and storage tanks.

The contents of this standard are substantially a selection from the appropriate Finnish standard relating to this area (SFS 3978)

1 Requirements

1.1 Application

The figure and table below give an outline of the standardised insulation/cladding constructions. These are described in detail on pages 2 - 12.

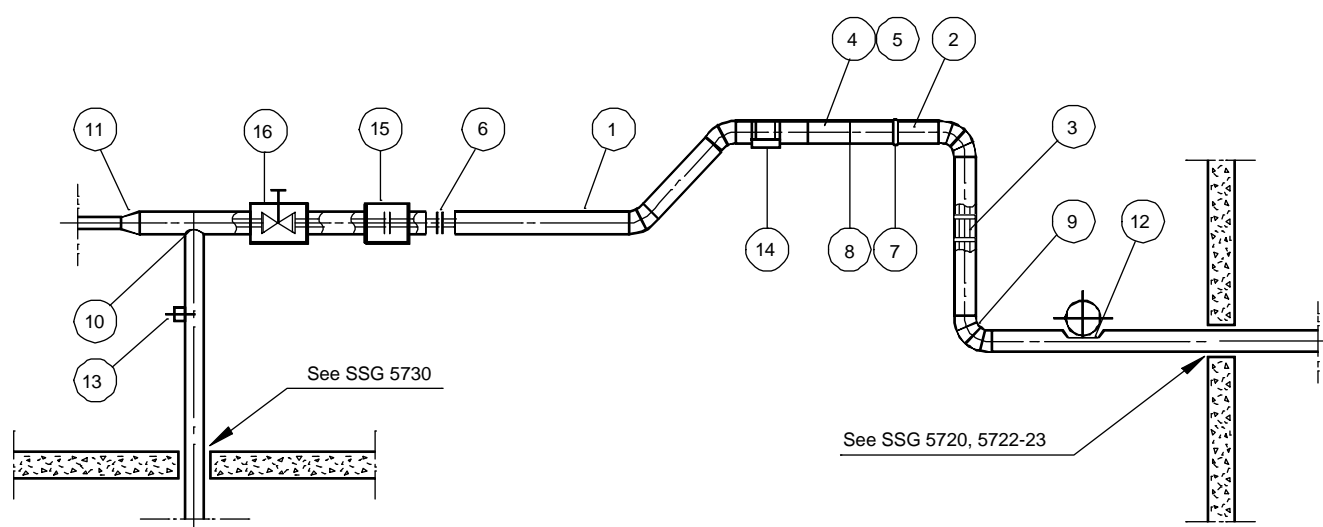

Table 1

Figure	Construction	Page
1	Insulation and cladding of horizontal pipelines	2
2	Mounting of mesh reinforced mat on pipelines	2
3	Insulation support on vertical pipelines	3
4A, 4B	Insulation of pipelines heated by steam	3
4C	Insulation of electrically heated pipelines	3
5	Insulation splices in multilayer insulation	4
6	Termination of insulation at flange joints	4
7	Support ring for cladding	5
8	Splices in cladding	5
9	Cladding of insulated pipe bends	6
10	Cladding of insulated T junctions	6
11	Cladding of insulated tapers	7
12	Insulation and cladding at pipe crossings	8
13	Insulation and cladding at tapping points	9
14	Insulation and cladding at sliding supports and hangers	10
15	Insulation and cladding at flange joints	11
16	Insulation and cladding at valves	12
