**Pipe fittings of chemical-resistant, glassfibre-reinforced, unsaturated ester plastic for process pipes. GAP pipe fittings. Connection sleeve with flange. PN10/6**

## Introduction

This edition differs from Edition 2 mainly through having been adapted to the Swedish Plastic Piping Code and the corresponding Finnish Standards in this sector.

## 1 Designation

**Connection sleeve with flange SSG 1810 - Inner diameter - Type of plastic - (Reinforced)<sup>1)</sup>**

### 1.1 Example

**Connection sleeve with flange SSG 1810 - 50 - Vinyl ester**

<sup>1)</sup> If reinforced inner and barrier layers are required this must be specified in the designation.

## 2 Requirements

### 2.1 General

#### 2.1.1 Material

According to the Swedish Plastic Piping Code where applicable.

#### 2.1.2 Manufacture

According to the Swedish Plastic Piping Code where applicable.

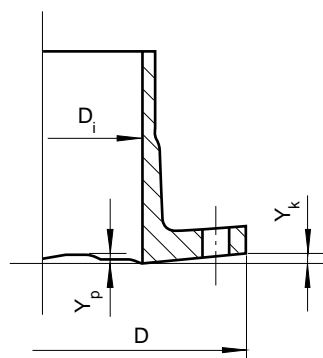

#### 2.1.3 Marking

Connection sleeves with flanges shall be marked with the following information:

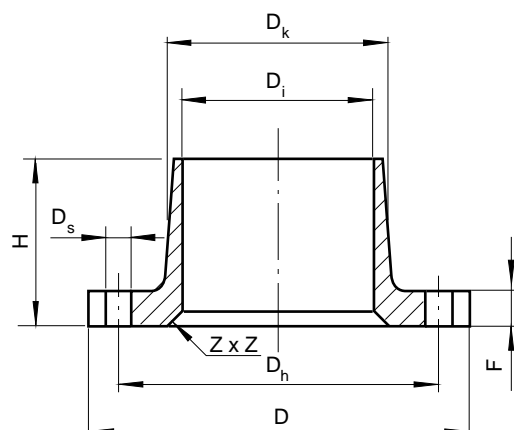

- Manufacturer's name or trade mark
- Type of plastic
- Pressure class (PN)
- Standard or type approval number
- Dimension (Inner diameter)
- Manufacturing date (year and month)

#### 2.1.4 Flatness

According to Table 1.
