SSG 3042E

General instructions for sound design of indoor and outdoor environments

Scope

The purpose of this standard is to give instructions on sound design which, when suitably adapted, can be generally applied to new project design and to the conversion of existing installations.

Changes since the previous edition

This edition differs mainly from the previous one in that checking has been done that the references to other standards and guidelines are still relevant.

Contents

1 Related documents 2

2 Sound design - indoor and outdoor environments 3
- 2.1 New project design and conversion of existing installations 3
