

Attachment plates for conveyor chains type 1698

Introduction

This standard is based on the old Swedish Standard SMS 2069.

Changes since the previous edition

Edition 4 differs from the previous edition in the manner of a light review of texts in the standard. A list of references has been added.

Contents

1 Designation	1
1.1 Example 1	1
1.2 Example 2	1
2 Requirements	1
2.1 General	1
2.1.1 Materials	1
2.2 Type, Dimensions	2
3 References	2

1 Designation

Attachment plate SSG 3325 - Type - Inner/Outer - Chain type - Breaking load - Pitch (p)

1.1 Example 1

Attachment plate SSG 3325 - K1 - Inner - Single - 1698A - 85 - 100 - p

1.2 Example 2

Attachment plate SSG 3325 - K1 - Inner - Single - 1698A - 85 - 100 - 10p

2 Requirements

2.1 General

2.1.1 Materials

Material: weldable steel of minimum 400 N/mm² yield stress.

The material is not specified in the designation. When special material is needed, however, the material is to be separately indicated in the designation.
