

Heating, ventilation and sanitation systems: Quality information, articles, ventilation, cooling and heating

Scope

SSG 3706E comprise recommendations for the quality requirements which ought to be placed on, for example, manufactured articles. The standard also states recommendations for material choices and selection in ducting systems as well as insulation.

Contents

1	Ventilation	3
1.1	Flues and exterior wall grilles	3
1.1.1	Dampers	4
1.1.2	Fire dampers	4
1.1.3	Noise traps	4
1.1.4	Air diffusers	4
1.1.5	Belt drives	6
1.1.6	Flow measurement	6
1.1.7	Electric motors	6
1.2	Service areas	6
1.3	Ducts and external coverings	6
1.3.1	Ducting systems	6
1.3.2	Internal insulation	7
1.3.3	Duct designation	8
2	Cooling	9
2.1	Liquid cooling plant	9
2.2	Absorption-type cooler	9
2.3	Refrigerant system/coolant systems	9
2.3.1	Water cooling	9
2.3.2	Water cooling with intermediate circuits	9
2.3.3	Re-cooling circuit	9
2.3.4	Central cooling design	9
2.3.5	Connection of cooling coils in fan rooms	10
2.3.6	Connection of circulation coolers in electrical areas	10
2.3.7	Connection of cooling baffles	10
2.3.8	Bleeding coolant and refrigerant systems	10
2.4	Cooling coils	11
2.5	Cooling refrigerant piping	11
2.6	Cooling media piping	12
2.7	Insulation	12
2.8	Air bleeding	12
2.9	Valves	12
2.10	Pumps	12
2.11	Manometers	12
2.12	Expansion vessel	12
2.13	Heat exchangers	13
2.14	Cooling plants	13
3	Heating	13
3.1	Heating coils	13
3.2	Heating media piping	13
3.3	Insulation	13
3.4	Piping suspension/pipe supports	13
3.5	Air bleeding	13
3.6	Valves	13
