

## Heating, ventilation and sanitation systems: Component numbering

### Scope

SSG 3709E includes recommendations for naming and numbering components in heating, ventilation and sanitation systems. Adaptation should be made to each facility's own standard.

### Contents

|  |   |
|--|---|
| <b>1 General</b>                       | 1 |
| <b>2 Department</b>                    | 1 |
| <b>3 Object type</b>                   | 1 |
| <b>4 Serial number/location number</b> | 1 |
| <b>5 Component designation</b>         | 2 |
| 5.1 Component designation – example    | 3 |
| <b>6 Index</b>                         | 8 |

### 1 General

Example of address construction: User address

Permitted letters: A–Ö

Permitted numbers: 0–9

**Table 1** Example:

|                               | 808 | - | VL | 802 | - | GT301 | - | X |
|-------------------------------|-----|---|----|-----|---|-------|---|---|
| Department                    |     |   |    |     |   |       |   |   |
| Object type                   |     |   |    |     |   |       |   |   |
| Serial number/location number |     |   |    |     |   |       |   |   |
| Component designation         |     |   |    |     |   |       |   |   |
| Index                         |     |   |    |     |   |       |   |   |

### 2 Department

The installation's system for numbering different departments must be used unless otherwise agreed.

### 3 Object type

Object type must be specified, according to [SSG 5275E](#) – *Function based identification system for processes and plants* or corresponding.

### 4 Serial number/ location number

Serial number or location number must be used.
