Heat exchangers – technical specification

Information within brackets ([...]) in this document refers to local regulations.

Scope

This standard covers several types of heat exchangers for cooling, heat recovery and heating of process media.

The standard is used in industry as a basis for project planning and procurement. The purpose is that affected parties can receive information about conditions and assumptions at an early stage so that the design is executed correctly.

Changes since the previous edition

This edition differs from the previous one in that:

- Sections 3.3 and 4.3 have been updated.
- References have been updated.
- The standard has been language reviewed and adjustments have been made for better readability.
