### Contents

#### 1 References

#### 2 General

#### 3 Location

#### 4 Design of operation rooms

- 4.1 Layout - Evacuation routes
- 4.2 Fire safety
- 4.3 Fire ventilation
  - 4.3.1 General instructions
  - 4.3.2 Design
  - 4.3.3 Project instructions
  - 4.3.4 Operation
  - 4.3.5 Inspection, service and maintenance
- 4.4 Fire detection
  - 4.4.1 General instructions
  - 4.4.2 Design
    - 4.4.2.1 Basic design
    - 4.4.2.2 Samplande system
  - 4.4.3 Project instructions
  - 4.4.4 Control, operation and maintenance
  - 4.4.5 Other
- 4.5 Dimensions of operation rooms
  - 4.5.1 General
  - 4.5.2 Switchrooms
  - 4.5.3 Space for ancillary equipment
  - 4.5.4 Transport routes
- 4.6 Other guidelines
  - 4.6.1 Running of cables to and from operation rooms
  - 4.6.2 Air treatment plants
  - 4.6.3 Lighting
  - 4.6.4 Windows
  - 4.6.5 Doors
  - 4.6.6 Locking system
  - 4.6.7 Floor
  - 4.6.8 Pressure relief
    - 4.6.8.1 Structural requirements
    - 4.6.8.2 Other guidelines
  - 4.6.9 Telecommunications
  - 4.6.10 Firefighting equipment
  - 4.6.11 Fire indication and alarm devices
- Appendix 1 Recommended dimensions for operation rooms
- Appendix 2 Smoke evacuation, example 1
- Appendix 3 Smoke evacuation, example 2
- Appendix 4 Transformatorbås (oljeisolerade transformatorer)
- Appendix 5 Transformer compartment (dry-insulated transformer)
