STANDARD SOLUTIONS GROUP

SSG 4310E

Cables – standard

Scope

This standard shows a standard selection of power cables, installation and wiring cables, control and telecommunication cables, as well as connection and machine cables. The standard also addresses part marking, CPR and conductor identification.

The standard deals mainly with halogen-free cables.

The current designation according to the CENELEC system (SS 424 17 02) is always given first. Designations under the old Swedish system (SS 424 17 01) are given in brackets where appropriate.

Changes since the previous edition

This version differs from the previous one by:

- The standard now deals mainly with halogen-free cables.
- The standard has been updated according to new CE marking and the new fire requirements for flame retardant cables.
- Chapter 8 – ”CPR” has been added.
- Cables are generally designated according to the CENELEC system.
- References have been checked and updated.
- The standard has been updated according to the current template for SSG standards.
