Foundations on roofs including sealing. General design

Information within brackets (**[**...**]**) *in this document refers to local regulations.*

Scope

This standard provides recommendations about general design of foundations, including sealing of roofs. The document is to be used within the industry as a basis for engineering and procurement. The purpose is to provide the involved parties with information concerning conditions at an early stage so that the construction will be performed correctly.

Changes since the previous edition

This edition differs from the previous one mainly in that previous type solutions for small foundations have been replaced and checks have been made to ensure that references to other standards and instructions are still relevant. Reference to seal liner guarantees have been added.
