# SSG 6560E

# Service platforms and gangways of steel – construction

## Scope

Information within brackets (**[...]**) in this document refers to local regulations.

This standard provides instructions on the design of service platforms and gangways of steel in industrial buildings.

The standard is to be used as a basis for engineering and procurement in order to provide the involved parties with information concerning conditions at an early stage. The standard is also used as design instructions.

## Changes since the previous edition

This edition differs from the previous one in that:

- A check has been done to ensure that instructions and references are still relevant.
- Figures have been adjusted.
- The designation for characteristic distributed load have been changed from $\sigma_k$ to $q_k$.
- Chapter 3 – ”Dimensioning” has been updated to better meet the needs of the industry.
