Förhandsgranskning / Preview

Edge protection by angle sections

Scope

The document gives instructions for the design of angle bar edge protections for use where there are no special requirements for maximum loads.

The document is to be used as a design instruction and as a basis for project planning and procurement to provide those concerned with information regarding conditions at an early stage. For edge protection against specific loads, the anchor bars shall be designed in each individual case.

Changes since the previous edition

This edition differs from the previous one in that:

- The structure has been slightly revised.
- Information on surface protection has been removed and replaced with references to surface protection standards.

Contents

1 Requirements 2
1.1 Material 2
1.2 Instructions for construction 2
1.3 Surface treatment 3
2 Designation 4
3 References 5
