

Damage to concrete in the paper and pulp industry and sawmills

Introduction

The present report deals with concrete and explains various types of attack and damage affecting concrete structures in the paper and pulp industries and at sawmills.

The report also gives instructions about the measures which can be taken to minimise damage to concrete.

Contents

1 Concrete	2
1.1 General	2
1.2 Cement.....	2
1.3 Additive	2
1.4 Mixing.....	3
2 Environmental attack	4
2.1 General	4
2.2 Frost attack	4
2.3 Reinforcement corrosion	5
2.4 Life	8
3 Chemical attack	9
3.1 Cement ballast reactions	9
3.2 Acid attack	10
3.3 Salt attack	10
4 Recommendations for the casting of new concrete	11
4.1 Frost.....	11
4.2 Reinforcement corrosion	11
4.3 Chemical attack	11
5 Repair of damaged sections	12
5.1 Condition assessment	12
5.2 The structure of the renovation system	12
5.3 Structural reinforcement.....	15
