

Blind flange. ISO and ID-dimensions. PN 10L (low pressure)

Orientation

This standard is a component of the standards for PED pipe classes, SSG 7830E, 7835E, 7840E and SSG 7845E.

For a list of existing and future SSG PED pipe classes, see SSG 7829E.

The blind flange has been calculated according to EU Directive PED 97/23/EC. For pressure/temperature values see SSG 7821E. PS=3 bar at TS=100°C. Max. temperature, 160°C.

NOTE: The blind flange must be fitted together with blind spade according to SSG 7386E.

1 Designation

Blind flange SSG 7376E - DN - Material

1.1 Example

Blind flange SSG 7376E - 200 - P265GH according to SS-EN 10 028-2
