

Blind flange. ISO and ID-dimensions. PN 16

Orientation

This standard is a component of the standards for PED pipe classes, SSG 7832E, 7837E, 7842E and SSG 7847E.

For a list of existing and future SSG PED pipe classes, see SSG 7829E.

The blind flange has been calculated according to EU Directive PED 97/23/EC. For pressure/temperature figures see SSG 7821E or SS-EN 1092:2001, table 17, PN 16. Material group: 14E0.

NB! The blind flange must be fitted together with blind spade according to SSG 7387E.

1 Designation

Blind flange SSG 7378E - DN - Material

1.1 Example

Blind flange SSG 7378E - 200 - P265GH as per SS-EN 10 028-2
