

General technical provisions for insulation contracts for piping and similar

Information within brackets ([...]) in this document refers to local regulations.

Scope

This standard is used in procurement between the purchaser and the supplier to secure deliveries of insulation for piping and similar, with respect to materials, execution and control.

Changes since the previous edition

This version differs from the previous one as follows:

- Section 2.2 has been updated with new information concerning surface cladding sheeting.
- References have been updated.
- The standard's design has been updated according to the current template for SSG standards.

Contents

1 General	2
1.1 Property and execution requirements	2
1.2 Cleaning	2
1.3 Welding	2
1.4 Pipe passages	2
1.5 Calculations	2
1.6 Time plan	2
1.7 Journal	2
2 Materials	3
2.1 Insulation materials	3
2.2 Surface cladding materials	3
3 Installation	4
4 Control	4
4.1 Time of control	4
4.2 Scope of control	4
5 References	5
